

Preparation & Application

www.turfco.com.au

■ Preparation

Prior to top dressing your lawn, the lawn should be mowed fairly low, lightly fertilised with TurfGro Fertiliser and then water the fertiliser in well.

■ Application

Apply your **TurfGro Top Dresser** at the rate of approximately 10mm per square metre. A 1 tonne bag of **TurfGro Top Dresser** will therefore cover 100m².

Applying the **TurfGro Top Dresser** too thick will smother your lawn and may create growth problems in the short term. Apply by means of shovel initially to disperse the turf dresser over the lawn and then rake evenly and lightly to ensure complete coverage of the area required. After raking, try to keep the top of the grass showing through, then water in well. Several light applications like this can be done over a few weeks until the desired affect is achieved.

■ New Turf Installation

TurfGro Top Dresser is also the ideal product to use when you first lay your new turf, it should be spread over your turf at the same rate as when you top dress but also a little heavier where the joins in your turf are.

Using **TurfGro Top Dresser** after laying your lawn will help the new turf establish at a much quicker rate. At the same time you will be able to level out any indentations that you may have made during the laying process.

■ Why Top Dress?

- > Levels off your lawn enabling a closer cut without scalping the lawn.
- > Assists in the control of thatch and strengthens lawn density
- > Improves nutrient absorption
- > Allows for even growth and improves lawn drainage
- > Sandy soils will be able to retain moisture better and so the lawn will be more resistant to drought.
- > Clay soils will drain better thus improving root development.
- > Top dressing also stimulates the grass to produce new shoots and so results in denser grass cover which helps combat the onset of weed and moss infestation.

Top dressing is carried out routinely by professional green keepers to ensure a top quality finish. If you want a really top quality lawn then you should top dress your lawn annually.
