# Lawn Recycling is here!

Most people admit their lawns let their house down... all because it's "just too difficult" to do anything about it.

Introducing Turfco's Lawn Recycling service... an innovative new service that uses your existing lawn as a base for a vibrant new lawn that will last the life of your home.

We've all had friends that tried to save a dollar by re-laying their own lawn... and heard the horror stories that go along with it. There's the application of several sprays to kill off the old vegetation... hiring of turf cutting equipment to lift up the old surface, getting in a bobcat and tipper to remove the old surface... new soil delivery and application, ameliorant application, buying in new turf, installation, watering, rolling... the list goes on and on!

Turfco's new 'Lawn Recycling' service uses state-of-the-art machinery to recycle your old lawn surface into a newly aerated, lifted and screened base for your brand new lawn. This can save you lots of time and money on ground preparation, as you instantly eliminate several costly processes.

Lawn Recycling can be suitable for:

- **NEW HOME LAWNS**
- **REPLACEMENT LAWNS**
- **LANDSCAPING PROJECTS**
- **SPORTS GROUNDS**

There's many benefits to recycling your lawn:

- **Uses your current soil**
- **No need for bobcat hire**
- **Low impact on your garden**
- **Environmentally friendly**
- **Minimal spraying required**
- **Fast and cost effective**

# Sir Walter ~ Australia's favourite lawn.

Turfcogrow and supply a variety of lawn turfs to suit all budgets, including the ever popular Sir Walter Premium Lawn Turf. Sir Walter Premium Lawn Turf can only be grown and supplied by a select group of expert turf producers, each fully licensed and committed to delivering the best quality turf with customer service second to none.

## ■ Drought Tolerant

Sir Walter is drought tolerant and needs minimal watering to keep its lush green appearance, all-year-round. Possessing a low thatch growth habit means moisture is locked in through a tight matrix of blades.

## ■ Full Sun & Shade Tolerant

Sir Walter is sun and shade tolerant and is perfect for both new lawns and replacing older, tree shaded areas.

## ■ Low Maintenance

Sir Walter has a weed resistant structure which keeps your lawn looking and feeling great, whilst keeping nasties such as black beetles and fungal pests at bay as well.

## ■ Soft Texture

Sir Walter provides you with a soft, lush lawn that not only feels great, but is strong enough to endure the rigours of daily family life.

## ■ Self Repairing

Sir Walter features an unusually long growing season and combined with its unique blade structure... you enjoy a lawn that self repairs like no other.

## ■ Salt Tolerant

Sir Walter is salt tolerant and perfect for coastal areas or inland regions where ground salinity may pose a challenge for other lawn varieties.

## ■ 100% Australian

Sir Walter is our own true blue, home grown turf keeping Aussie money with our Aussie turf growers.
